linkedin.com/in/annajappa-gadige | github.com/Annajappa | portfolio-eta-two-r53drm8vwy.vercel.app

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO, API Development

AI & GenAI: OpenAI, Anthropic Claude, Google Gemini, Sarvam AI, LangChain, RAG (Retrieval-Augmented Generation), Large Language Models (LLMs), Machine Learning & NLP Fundamentals, BM25, Agent Systems, Multi-Agent Systems, Prompt Engineering, Embeddings, Semantic Search, Hybrid Search, MCP, AI Automation

Databases & Vector Stores: PostgreSQL, Supabase, ChromaDB, Redis, MongoDB

Tools & Practices: Git, GitHub, Postman, Prisma ORM, Vercel, Docker, Agile/Scrum, System Design, Object-Oriented Programming (OOP), Data Structures & Algorithms

EXPERIENCE

Executive - GenAI Developer, RuralShores Business Services Private Limited

Nov 2025 – Present

- Owned two GenAI products end-to-end, from design through deployment on Vercel and on-premise infrastructure.
- Built LeaseIQ, extracting 290 lease data points across 18 categories from PDFs via the OpenAI SDK through a three-tier review workflow into client-ready Excel deliverables.
- Fixed a production failure where 80+ page leases never processed, replacing full-document prompting with BM25 relevance retrieval — 100+ page documents now complete in under 2 minutes at ~79% lower cost, with accuracy gains from domain vocabulary matching.
- Built GramAI Catalyst, an LMS AI learning assistant serving 105 students across 9 courses, using a LangChain + OpenAI RAG pipeline over course content to keep answers grounded in approved material.
- Reduced AI chatbot response latency from 15s to ~400ms (~97% faster) by implementing Redis caching and database read replicas, improving real-time responsiveness for students.

Full-Stack Developer Intern, Kajkarma Innovation Pvt. Ltd

May 2025 – Oct 2025

- Built and deployed the frontend for Diano, a jewelry e-commerce platform, using Next.js, TypeScript, and Tailwind CSS, integrating REST APIs for product management and JWT-based authentication.
- Improved page load time by ~30% through image optimization, code splitting, lazy loading, and backend API caching, while ensuring cross-browser compatibility.

PROJECTS

LeaseIQ — Enterprise Lease Abstraction and Intelligence Platform

Tech Stack: Next.js 16, React 19, TypeScript, PostgreSQL, Prisma, OpenAI GPT-4o, Tailwind CSS, Supabase, Vercel

- Built a platform that reads commercial property lease documents and automatically extracts 290 key data points, replacing a manual process, with a three-stage human approval workflow before final Excel reports are issued.
- Fixed a critical production issue where large leases (100+ pages) never finished processing — they now complete in under 2 minutes.
- Reduced AI processing cost per document by ~79% while improving extraction accuracy.

GramAI LMS — Multilingual AI-Powered Learning Management System

Tech Stack: Next.js 16, React 19, TypeScript, PostgreSQL, Prisma, Anthropic Claude, Google Gemini, Sarvam AI, Tailwind CSS, Better Auth

- Built an end-to-end LMS delivering GenAI courses to 105 students across 9 courses in rural communities, with multi-language UI support (English, Hindi, Kannada) and role-based workflows for Admins, Faculty, and Students.
- Integrated course-scoped AI faculty mentors using Claude and Gemini APIs with Sarvam AI voice services, enabling real-time multilingual voice and text tutoring with automated query resolution.
- Implemented an automated assignment evaluation engine, interactive quiz scoring, automated certificate generation, and real-time student progress tracking.

EDUCATION

Bachelor of Technology – Computer Science, Sree Vidyanikethan Engineering College

Jun 2021 – May 2025

CGPA: 9.28/10 | Tirupati, Andhra Pradesh, India
